2022-2023 BANNER CONTEST
I SAW IT OUT MY WINDOW

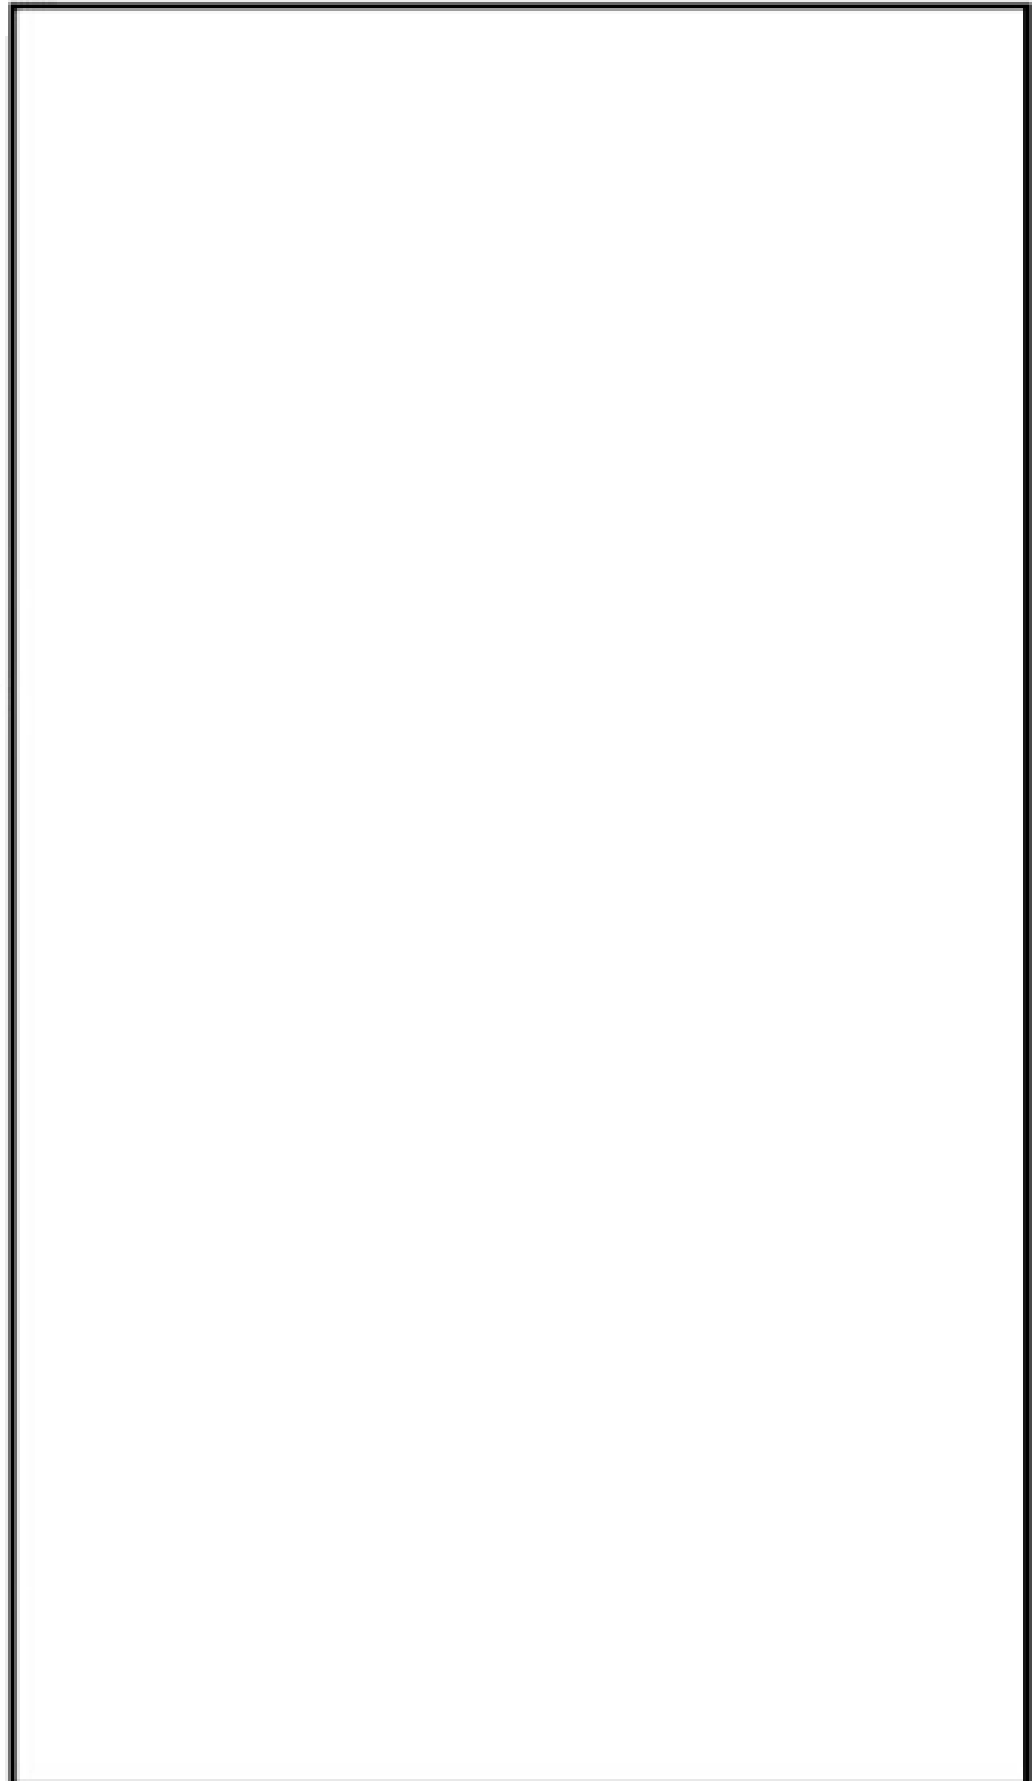

HOW:

The official entry form must include both page one and page two of this document **printed front and back**.

Entries are judged anonymously. Do NOT write student's name on this page. Create your design within the vertical rectangle to the right.

Some things to consider when creating your design:

- ▶ Bigger is better. Large graphics will translate better to the banner than a smaller, more intricate design.
- ▶ Think bold. Strong, saturated colors will translate well.
- ▶ Consider your medium for reproduction. The artwork will be scanned into a computer to create the banner. Paints and markers may reproduce better than crayons or pencils.
- ▶ Some cropping near the edges may occur when the banners are created. Keep this in mind when you design and keep your most important images toward the center of the banner.
- ▶ All entries should include elements to represent the theme. You may choose to include words, but it is not necessary.
- ▶ Work should be original and shall not include copyrighted images such as branded cartoon characters.

Create artwork inside the box. For best results, fill entire area.
Only entries on this form are eligible.
